Research Scientist at the intersection of AI and Physics

Work Experience

- | | |
|---|------------------------------|
| Perfomax
<i>AI Advisor</i> | May 2026–present |
|
 | |
| National University of Singapore
<i>Postdoc under Kostya Novoselov</i> | 2022–present |
| <ul style="list-style-type: none">▪ Leadership :<ul style="list-style-type: none">· Program Chair for the AI4X 2025/6 conferences.· Main organizer of the ICLR 2025 workshop on multiscale machine learning.▪ Transformer for generating symmetric crystals :<ul style="list-style-type: none">· Created a generative model for material design based on symmetry inductive bias.· Implemented the model in PyTorch.· Achieved the best generation quality and diversity among space-group-conditioned models.· Led a team of 6.▪ ML for predicting properties of defects in 2D crystals :<ul style="list-style-type: none">· Created a sparse representation of crystals with defects, achieving 4x energy prediction error reduction.· Developed code for reproducible parallel running of machine learning experiments.· Led a team of 3. | |
|
 | |
| Constructor Group
<i>Machine Learning Consultant</i> | February 2021–present |
| <ul style="list-style-type: none">▪ AI/ML Consulting | |
|
 | |
| CERN [Yandex → HSE University]
<i>Researcher</i>
2025 Breakthrough Prize in Fundamental Physics as a member of LHCb. | 2014–2022 |
| <ul style="list-style-type: none">▪ Generative models uncertainty estimation :<ul style="list-style-type: none">· Developed the first methods for estimating uncertainty of conditional GANs.· Led a team of 3 students.▪ Generative models for fast simulation :<ul style="list-style-type: none">· Developed a GAN-based machine learning model for high-fidelity simulation of a Cherenkov detector trained on tabular data.· Achieved approximately 10^5 speed-up compared to the ab-initio simulator.▪ Machine learning on noisy data :<ul style="list-style-type: none">· Developed a rigorous way to train ML algorithms on data with the label-noise model common in high-energy physics.▪ Muon identification at the LHCb experiment at CERN :<ul style="list-style-type: none">· Solved a classification problem over tabular data with noisy labels under timing constraints.· Developed a gradient boosting model that reduced the false positive rate by 30% in the critical low-track-momentum region.· Integrated the model into LHCb production, mostly in C++.· Packaged the work as a data science competition problem for IDAO-2019.▪ CatBoost aka fighting biases with dynamic boosting :<ul style="list-style-type: none">· Set up a distributed system for running experiments for the team with Bash and Python.· Studied gradient boosting improvements with experiments on toy data. | |

Education

- Higher School of Economics (HSE University)** 2016–2020
PhD in Computer Science, supervisor [Andrey Ustyuzhanin](#); [Machine Learning for particle identification in the LHCb detector](#).
- Sapienza — Università di Roma** 2016–2020
PhD in Physics (double degree with HSE), supervisor [Barbara Sciascia](#).
- Product Management course at Yandex** Spring 2018
Focused coursework in product strategy and execution.
- Yandex School of Data Analysis** 2013–2015
Master's level CS course covering algorithms, machine learning, deep learning, and distributed systems.
- Moscow Institute of Physics and Technology**
MS in Physics (2014–2016): Optimisation of data processing of the LHCb experiment.
BS in Physics (2010–2014): Study of the quantum states of the electrons in nonideal plasma and selected molecules using wave packet molecular dynamics with packet splitting.

Mentorship

- Mentored 9 students ([1](#), [2](#), [3](#), [4](#), [5](#), [6](#), [7](#), [8](#), [9](#)), 3 interns, and student workshop projects ([1](#), [20](#)).
- Student council member from 2013 to 2016, leading several dormitory-scale IT projects.
- Co-PI of a \$3.4m AI Singapore grant on multiscale machine learning.

Teaching & Outreach

- Pitch research to the general public through major newspaper coverage ([1](#), [2](#)), blog posts ([1](#), [2](#)), a [science slam](#), interviews ([1](#), [2](#)), and a public [talk](#).
- Taught at the Machine Learning in High Energy Physics Summer School in [2015](#), [2016](#), [2017](#), [2018](#), [2019](#), [2020](#), [2021](#), and [2023](#).
- Lecturer in the [Coursera Advanced Machine Learning specialisation](#), which is [award-winning](#).
- Taught and developed an introductory data analysis [course](#) at HSE.
- Delivered more than 20 [conference talks](#).

Service

- Reviewer for RSC Advances, Machine Learning: Science and Technology, and AI for Accelerated Materials Design workshops at NeurIPS and ICLR (2023–2025).
- Peer Staff Supporter at NUS, serving as a first-line support for mental wellbeing.

Skills

ML & AI (Structured, non-text, domain-specific data) ·
Python (Research coding) ·
PyTorch (Deep learning) ·
C++ (Production) ·
Linux (Administration) ·
Research Writing & Speaking ·
Physics (Deep domain understanding) ·
Leadership & Mentorship
