Research Scientist focusing on AI Agents & ML Reliability

WORK EXPERIENCE

PERFOMAX *AI Advisor* 2026–present

NATIONAL UNIVERSITY OF SINGAPORE *Postdoc under [Kostya Novoselov](#)* 2022–present

Leadership

- Program Chair for the [AI4X 2025/6 conferences](#)
- Main organiser of the [ICLR 2025 Workshop on Machine Learning Multiscale Processes](#)
- Co-PI of a US\$3.4m AI Singapore grant on multiscale machine learning

Wyckoff Transformer, a generative model for materials [ICML 2025](#) · [GitHub](#)

- Developed a coordinate-free permutation-invariant autoregressive Transformer encoder model for material generation and property prediction based on symmetry inductive bias
- Increased materials discovery yield (S.U.N.) by 1.24x
- Cut inference to 0.05 GPU-ms/structure — 4 orders of magnitude faster than prior models
- Implemented the model in PyTorch; production-ready package published on [PyPI](#)
- Orchestrated large-scale (10k structures) DFT computations with VASP on an HPC cluster
- Led a team of 6

(CERN | YANDEX → HSE UNIVERSITY) *Researcher* 2014–2022

[2025 Breakthrough Prize in Fundamental Physics](#) as a member of LHCb.

Generative models uncertainty estimation [paper](#) · [conference](#) · [code 1](#) · [code 2](#)

- Developed the first methods for estimating uncertainty of conditional GANs
- Led a team of 3 students

Generative models for fast simulation [paper 1](#) · [paper 2](#) · [paper 3](#) · [code](#)

- Built a GAN for high-fidelity, tabular-data simulation of a Cherenkov detector
- Reached $10^5\times$ speed-up over the full Geant4 simulation

EDUCATION

HSE University & Sapienza Università di Roma <i>PhD in Computer Science and Physics (Double Degree)</i> Supervisors: Andrey Ustyuzhanin & Barbara Sciascia Thesis: Machine Learning for particle identification in the LHCb detector	2016–2020
Product Management course at Yandex <i>Focused coursework in product strategy and execution.</i>	2018
Yandex School of Data Analysis <i>Master's-level CS programme</i> Algorithms, machine learning, deep learning, and distributed systems.	2013–2015
Moscow Institute of Physics and Technology <i>MS in Physics</i> Optimisation of data processing of the LHCb experiment.	2014–2016
<i>BS in Physics</i> Wave-packet molecular dynamics of electrons in nonideal plasma.	2010–2014
International Junior Science Olympiad (IJSO) Silver medal	Korea, 2008

MENTORSHIP

- Mentored 9 students ([1](#), [2](#), [3](#), [4](#), [5](#), [6](#), [7](#), [8](#), [9](#)), 3 interns, and student workshop projects ([1](#), [2](#)).

TEACHING & OUTREACH

- Pitch research to the general public through major newspaper coverage ([1](#), [2](#)), blog posts ([1](#), [2](#)), a [science slam](#), interviews ([1](#), [2](#)), and a public [talk](#).
- Lecturer in the [award-winning](#) Coursera Advanced Machine Learning [specialisation](#)
- Delivered more than 20 [conference talks](#).

SERVICE

- Reviewer for NeurIPS, RSC Advances, Machine Learning: Science and Technology, Digital Discovery
- Peer Staff Supporter at NUS, serving as a first-line support for mental wellbeing.

SKILLS

- **Generative modelling for scientific data** – GANs, autoregressive transformers, and diffusion; from fast detector simulation to symmetry-aware crystal generation.
- **Uncertainty quantification** – built the first methods for estimating the uncertainty of conditional GANs; calibrated generative and discriminative models.
- **ML on structured, non-text data** – tabular, graph, and atomistic representations, spanning gradient boosting to transformers.
- **Research leadership** – lead multidisciplinary teams, chair conferences, and mentor students from idea to publication.

PRESENTING AT ICML 2026

July 11, 12:15–13:30 – Nikita Kazeev and Ian Babich. [“Foresight-Phys: A Benchmark for Forecasting the Results of Physical Experiments”](#). In: *Forecasting as a New Frontier of Intelligence Workshop at ICML 2026*.

July 11, 15:00–16:30 – Nikita Kazeev and Phan Bui Nhat Huyen. [“Position: Align AI to Our Aspirations, Not Our Flaws”](#). In: *Pluralistic Alignment Workshop at ICML 2026*.

July 11, 15:30–17:00 – Nikita Kazeev and Andrey Ustyuzhanin. [“The Geometry of Reasoning Failure: Predicting Agent Errors from Semantic Scale Trajectories”](#). In: *Statistical Frameworks for Uncertainty in Agentic Systems Workshop at ICML 2026*.

July 10, 11:40–13:30 & 16:10–17:00 – Nikita Kazeev and Andrey Ustyuzhanin. [“Uncertainty Quantification for LLM Agents via Semantic Abstraction Trajectories”](#). In: *Structured Probabilistic Inference & Generative Modeling Workshop at ICML 2026*.
